

SRIRAM Y

Chennai, Tamil Nadu — sriram8248196342@gmail.com — +91 8248196342 — [linkedin.com/in/sriram-ai-dev](https://www.linkedin.com/in/sriram-ai-dev) — github.com/Sriram042005 — sriram042005.github.io/Portfolio

Professional Summary

Driven BCA graduate in Artificial Intelligence specializing in AI Engineering, semantic search systems, and Agentic AI framework design. Hands-on experience architecting scalable enterprise RAG pipelines and autonomous multi-agent workflows using Python, LangGraph, and LangChain, Context Engineering, AI Harness Engineering,

Education

Bachelor of Computer Applications (Artificial Intelligence)

Aug 2023 – May 2026

B.S. Abdur Rahman Crescent Institute of Science and Technology

Chennai

CGPA: 8.59/10.0 **Technical Skills**

Programming: Python, SQL

AI & Machine Learning: Scikit-learn, TensorFlow, PyTorch, Hugging Face Transformers, OpenCV, CNN, Regression, NLP, Semantic Search, Embeddings

Generative AI: LangChain, LangGraph, LlamaIndex, RAG, AI Agents, CrewAI, AutoGen, MCP (Model Context Protocol), Prompt Engineering, Context Engineering, Fine-tuning, Llama 3, Gemini, OpenAI API, Ollama

Backend Development: FastAPI, Flask, REST APIs, JWT Authentication

Databases: MySQL, Pinecone, ChromaDB

Tools & Platforms: Git, GitHub, Docker, Streamlit, Postman, VS Code, Jupyter Notebook, Vercel

Projects

NEXUS: Secure Enterprise Knowledge Retrieval – Academic Project

Jan 2026 – May 2026

- **Problem:** Inefficient enterprise data retrieval prone to LLM hallucinations and unauthorized data access across roles.
- **Role:** Architected a secure RBAC-integrated RAG pipeline with custom chat routing and dynamic metadata filtering.
- **Technologies:** Python, LangChain, Llama 3 (Ollama), Pinecone, Flask, nomic-embed-text.
- **Results:** Eliminated hallucinations via retrieval grounding; secured sensitive data using dynamic Pinecone metadata filtering; handled 500MB+ bulk document uploads with sub-2s query latency. **Published in JETIR (April 2026).** [GitHub]

Agentic Data Analyst Pipeline – Personal Project

May 2026 – Jun 2026

- **Problem:** Manual overhead in processing tabular stock datasets and writing complex SQL for financial analysis.
- **Role:** Developed an autonomous multi-agent pipeline with a text-to-SQL engine and sandboxed self-healing error-correction loop.
- **Technologies:** Python, LangGraph, LangChain, Llama 3, Gemini, SQLite, Streamlit.
- **Results:** Achieved 100% code execution success rate; enabled non-technical teams to query databases via natural language. [GitHub]

Internship Experience

Intern – AI/ML | InternPe

Aug 2025 – Sep 2025

- Built and evaluated predictive ML models using Python (Pandas, Scikit-learn); applied EDA, feature engineering, and preprocessing pipelines on real datasets.
- Improved model accuracy through iterative tuning; delivered reproducible analysis notebooks with documented results and performance benchmarks.

Certifications

Backend Development and API Creation (Coursera)

GenAI for IT: Transforming IT with Generative AI (Infosys Springboard)

Python for AI & Machine Learning (IBM)

Credential Links: [LinkedIn/sriram-ai-dev](https://www.linkedin.com/in/sriram-ai-dev)

Publication

NEXUS: Secure Enterprise Knowledge Retrieval with Role-Based Access Control

Journal of Emerging Technologies and Innovative Research (JETIR)

April 2026

Languages

Tamil (Native) | **English** (Professional Working Proficiency) | **German** (Basic Reading & Writing)
